

SPIT's distinctive orange tools have been used on the most of the construction sites since 1951 to realise your projects.

SPIT provides you:

A full line-up of electrical and electro pneumatic hand tools and fastening products complete with gas powered and powder actuated tools.

A wide range of anchor systems designed by our research department to meet the latest European safety standards and technical specifications.

A broad range of chemical anchors and fixing solutions applicable even in saline or drinking water, and high and low temperatures.

A range of diamond tools benefiting from ITW's know-how for all kinds of sawing, drilling and cutting applications.

SPIT logo is your assurance of a product whose safety and quality have been proven by the major regulatory agencies.
